VCS Partners with Rain to Offer Meaningful Financial Benefits to Customers

Freehold, NJ (October 4, 2022) — Visual Computer Solutions, Inc. (VCS), a leading workforce management software provider, today announced a partnership with Rain that will provide customers the ability to access earned wages early.

Rain is a leading earned wage access provider that is enabling workers to gain control over their finances by allowing them to cash out wages that workers have accrued but haven't yet received. Through this partnership, VCS will be able to offer current and future customers instant access to earned wages.

"The VCS platform revolves around the employee. Our software arms workers with the tools they need to better manage their schedules, workloads, learning and professional development goals, and more," said Guy DiMemmo, CEO & Founder of VCS. "A strategic partnership with Rain will allow us to provide employees with another benefit we think they'll find very appealing: getting paid quicker. We're excited to provide our customers with quicker compensation options for their hard work."

The initial rollout of the VCS-Rain integration will be available for all of VCS' Jobs4Blue (Managed Services for Police Side Jobs) clients. Rain Instant Payments will be added as a new feature within the Jobs4Blue app. If Jobs4Blue users choose to opt in, they will have the ability to turn their earned wages into cash after they complete a side job or anytime they need funds before payday. Their timesheets, recorded in the VCS platform, will be reported to Rain, who will then issue a portion of their paycheck early.

Rain allows its users to transfer up to 50% of their earnings (up to $500), transfer funds anytime and as often as needed, and charges a small fee of $3.99. Rain helps employees avoid payday loans, overdrafts, and late fees.

"We are very excited about the start of our collaboration with VCS's Jobs4Blue and we are looking forward to ensuring that our law enforcement officers have early access to their paychecks," said Camelia Ganga, VP of Marketing at Rain. "We are on a mission to empower all American employees, regardless of their income or credit score, to achieve financial independence by giving them access to their accrued wages anytime they need it and we are looking forward to serve all VCS customers in the near future."

VCS plans to expand beyond Jobs4Blue and offer the Rain Instant Payments feature to all customers in the near future.
