VCS Joins ADP Marketplace to Aid the Public Sector in Controlling Labor Costs, Managing Compliance Risks and Improving Employee Productivity

Freehold, NJ (February 27, 2020) — VCS, intelligent workforce management software, today announced a key integration with ADP, a leader in online payroll and HR solutions, that simplifies employee scheduling, time and attendance, human resources and payroll for the entire government workforce.

The integration is available exclusively on ADP Marketplace, a digital HR storefront offering a collection of highly rated solutions ready to simply and securely share data with the ADP platform.

Available for ADP Workforce Now clients, the seamless integration simplifies payroll with the accuracy and reliability of VCS electronic timesheets that provide a trackable workforce solution. Employees submit timesheets electronically to supervisors or managers for immediate and real-time approval, and with the ability to seamlessly integrate with ADP, information is instantly sent to payroll for timely and efficient processing.

"Processing your payroll should not be difficult and time-consuming, and we're excited to show ADP Workforce Now clients just how simple our software can make this once tedious task," said Guy DiMemmo, CEO & Founder of VCS. "Plus, our platform also offers a vast multitude of features and add-on modules so that ADP Workforce Now clients can pick and choose to create the perfect time and labor solution to fit their specific needs."

Clients leveraging the integration will also benefit from additional time and labor management features VCS offers, including tools to automatically assign and grant PTO and overtime requests with rules-based processes, automate pay rules, staffing, and compliance requirements, track employee activities, and measure engagement and growth, and many more.

For more information about VCS solutions visit VCS on ADP Marketplace.
