# Contactless Time Clocks

Take time and attendance to the next level by leveraging VCS contactless technology to accurately and safely track your employees' attendance. Confirm attendance records against our time and labor management software to avoid time-theft methods such as buddy punching and ensure 100% accurate schedule data for payroll processing.

Plus, adhere to current safety guidelines and protocols by eliminating the need for employees to touch a shared device by pairing a time clock with a key fob, or allowing employees to clock in/out from any personal device of their own.

Ready to go touchless with your employee time clocks?

INTELLIGENT WORKFORCE MANAGEMENT
